

4. Vnesite referenčno številko in geslo.

# Prezem digitalnega potrdila

Vpišite podatke za prevzem nato kliknite Naprej.

**Referenčna številka:**

**Geslo za prevzem:**

5. Potrdilo boste tako prevzeli na vaš računalnik. Zaženite datoteko in sledila bo namestitev. Čarovnik za uvoz certifikata vas bo vprašal ali naj ga shrani na računalnik ali na aktivnega uporabnika tega računalnika. Kliknite naprej.

← Certificate Import Wizard

## Welcome to the Certificate Import Wizard

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.

A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.

Store Location

Current User

Local Machine

To continue, click Next.

6. Program bo javil v katero mapo bo namestil certifikat. Kliknite naprej.

The screenshot shows the 'Certificate Import Wizard' window. The title bar reads 'Certificate Import Wizard'. The main heading is 'File to Import' with the instruction 'Specify the file you want to import.' Below this is a 'File name:' label followed by a text input field and a 'Browse...' button. A 'Note' section lists supported certificate formats: Personal Information Exchange- PKCS #12 (.PFX,.P12), Cryptographic Message Syntax Standard-PKCS #7 Certificates (.P7B), and Microsoft Serialized Certificate Store (.SST). At the bottom right, there are 'Next' and 'Cancel' buttons.

7. **POMEMBEN KORAK!** Vpišite geslo za prevzem (je enako kot ste ga vpisali pri prevzemu certifikata) in **obvezno vstavite kljukico na možnost ponovnega izvoza ključa**. Brez te kljukice certifikata ne bo mogoče še kdaj izvoziti in ponovno uvoziti, ampak boste morali naročiti novega. Certifikata prav tako ne boste mogli povezati v Fakturiranje. Ostale nastavitve pustite tako, kot jih je nastavil čarovnik. Kliknite naprej.

The screenshot shows the 'Certificate Import Wizard' window at the 'Private key protection' step. The title bar reads 'Certificate Import Wizard'. The heading is 'Private key protection' with the instruction 'To maintain security, the private key was protected with a password.' Below this is the instruction 'Type the password for the private key.' There is a 'Password:' label followed by a password input field (masked with dots) and a 'Display Password' checkbox. The 'Import options:' section contains three checkboxes: 'Enable strong private key protection...' (unchecked), 'Mark this key as exportable...' (checked), and 'Include all extended properties.' (checked). At the bottom right, there are 'Next' and 'Cancel' buttons.

8. Pustite nastavev, da čarovnik sam izbere primerno lokacijo certifikata. Naprej.

**Certificate Store**  
Certificate stores are system areas where certificates are kept.

Windows can automatically select a certificate store, or you can specify a location for the certificate.

Automatically select the certificate store based on the type of certificate

Place all certificates in the following store

Certificate store:

9. Čarovnik bo le še vprašal ali res namesti digitalno potrdilo, kar boste seveda potrdili in namestitev bo uspešna.
10. V programih Vasco boste certifikat lahko povezali in uporabili od začetka decembra.
